On the upcoming December 7th, 20 years will be completed since the Indonesian invasion of East Timor.

20 years during which 200.000 people were killed - a third of East Timor's population.

20 years of persecution and torture, of political and cultural repression by Indonesian Imperialism.

20 years of resistance and struggle by the people of East Timor.

On December 7th, we must show the UN, the world governments and specially the Indonesian government that youth worldwide is aware of East Timor and is ready to support the heroic 20 year struggle of its people for a justly claimed independence and self-determination.
